

Protect Your Home!

Everybody fears fire and every effort should be made to prevent them starting, even more than to extinguish them after they have started. As long as our homes are built of lumber the is a certain amount of danger from fire, both from within and without. Therefore, any chemical preparation that render lumber fire-proof is a thing very much to be desired.

Such a preparation is now on the market and the public is invited to test its merits. It is called PLUTANICA. It renders all wood work fire-proof and at the same time acts on the pores of the wood in such a manner as to preserve it indefinitely. It costs very little and is easily applied to any wood work.

B. V. Reeves has the agency for PLUTANICA in this district. See him and have a practical demonstration of the merits of this preparation and get his figures for applying it to your home.
